

# Clecos Made Easy

This comes from Chattanooga, TN, courtesy of CL Melenzyer. "If memory serves me correctly, I picked the idea up at a workshop at Sun'n Fun in Lakeland, FL 10 or 12 years ago. Being able to pick and place with one hand is a time saver and work enabler."

Start by drilling a board to hold your clecos. This example held 12 each of 4 different sizes of clecos.

2. Lift a cleco.

1. Select a cleco.

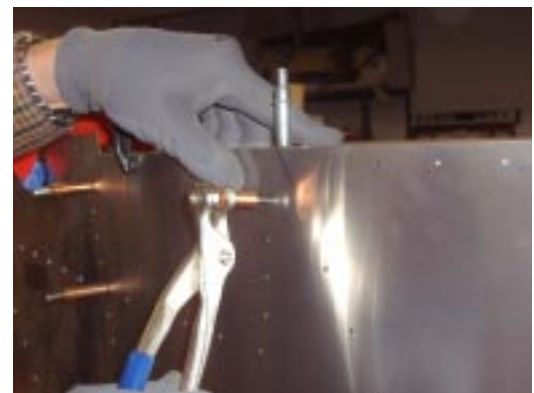

4. Position cleco.

3. Check the cleco.

6. Cleco inserted.

5. Prepare to insert cleco.
